

VT-87(6C/6B) Metal tag

Introduction

- Based on independent intellectual property development, adapt tag to work with global frequency range
- Adopt high performance NXP(SL\XL\XM) chip, to get the best read effect
- Application : Logistics and supply chain management 、 Manufacturing and assembly management, Automatic toll for parking lot, Social Taxi Management, Plastic pallet for warehouse

Specification

Specification	
Model#	VT-87 (6C/6B)
	
Performance Index	
Protocol	EPC CLASS1 Gen 2 / ISO 18000-6C/ ISO18000-6B
Chip	NXP(SL\XL\XM)
Frequency	840—960MHZ
Memory capacity	96/368/512/880/1024/2048bit
Dimension	201x12x13 mm
Work mode	Read/Write
Storage time	> 10years
Erasable times	> 100,000times
Material	PCB antenna, ABS Case
Application	License plate tag, Mount on the license plate position Wiper tag, mount on the position of the vehicle wiper
