

# VT-80(6B/6C) PVC WHITE CARD

## Introduction

- Based on independent intellectual property development, adapt tag to work with global frequency range.
- Linearly polarized design with ultra-high read rates in a particular direction, high sensitivity tag identification
- High security performance, With unique TID
- mainly used in urban intelligent traffic management, social operating lease vehicle management, parking management, automatic toll road

Specification	
Model#	VT-80/6B
Performance Index	
Protocol	ISO 18000-6B/ ISO 18000-6C
Chip	ALIEN or impinj、NXP
Frequency	860—960MHZ
Memory capacity	96/368/512/880/1024/2048bit
Dimension	85*54mm
Working mode	Read and write
Storage time	> 10years
Erasable times	> 100,000times
Working temperature	-20℃~+50℃
Storage temperature	-40℃~+100℃
Materail	PVC
Installation method	Card holder
